

**CIRCUITS AND METHODS FOR REDUCING INTERFERENCE
FROM SWITCHED MODE CIRCUITS**

ABSTRACT OF THE DISCLOSURE

5 A system 100 including a radio receiver 101/ 108 and
switched mode circuitry 114/115 operating at a selected
switching frequency is disclosed. Circuitry 207-209 sets
the switching circuitry of the switched mode circuitry
114/115 as a function of a frequency of a signal being
received by a radio receiver 101/108.
